### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

In response the examiner's concern regarding the claimed process of growing olefin polymer particles between the catalyst support and the skin layer, applicants provided Galli et al., "The Reactor for Granule--a Unique Technology for the Production of a New Generation of Polymer Blends", Society of Plastics Engineers, Polyolefins VII international Conference, Houston, Texas, February 24-27, 1991, which discloses that multilayer olefin polymer particles are prepared polymerizing olefin between a Ziegler catalyst particle and an olefin skin layers formed on the surface of the Ziegler catalyst particle. While Galli generically disclosed the preparation multilayered olefin polymer particles in the presence of a Ziegler catalyst, Galli does not teach or reasonably suggest preparation of propylene copolymer trilayer particles having the properties of the instant claims. It is noted that the multilayered propylene copolymer particles of the instant claims are prepared in the presence of a metallocene catalyst, and applicants further provided Comparative Example 3 as listed in Table 1 that the propylene copolymer particles prepared by a Ziegler catalyst does not satisfy the decane solubility limitation of the instant claims. In view of the foregoing, the instant claims are deemed to be nonobvious and novel over Galli, and are in the condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Caixia Lu whose telephone number is (571) 272-1106. The examiner can normally be reached on 9:00 a.m. to 5:30 p.m..
